

Aged immigrants: The forgotten older adults

Author/s: Thomas, Trang | **Year:** 2003 | **Publication type:** Journal article | **Peer reviewed:** | **Topic area/s:** General CALD, Mental Health

Reference:

Key Words:

Vietnamese, mental health, migration at older age

Research aim:

This paper will comment on psychological issues related to Vietnamese older people who migrated to Australia during the later years of their life.

Results/Conclusion:

The significant differences in the values of the Vietnamese and Western culture have been raised frequently as the main obstacles to good mental health of older Vietnamese migrants

Implications:

Cultural Group(s):

Vietnamese
