

# Development of a Translation Standard to support the improvement of health literacy and provide consistent high-quality information

**Author/s:** Michaels, Jaklina Ayles, Tracy Ogrin, Rajna | **Year:** 2013 | **Publication type:** Journal article | **Peer reviewed:** | **Topic area/s:** Language and Translation

**Reference:**

**Key Words:**

language, translation, nursing, service provision, health literacy

**Research aim:**

This paper describes the development of a Translation Standard, led by a community nursing organisation in collaboration and consultation with CALD community members and peak community organisations in Melbourne, Australia.

**Results/Conclusion:**

The Translation Standard includes 10 components that have been identified as necessary to ensure a minimum standard of translation that is of high quality and caters to the health literacy levels of the target audience.

**Implications:**

**Cultural Group(s):**

Several CALD groups

**Location of study:**

**Age group:**

**Number included in study:**

N/A

**Type of participants:**

**Research approach:**

**Type of data:**

**Secondary data sources used:**

**Specific scales or analytical techniques used:**

**Implications/ Recommendations:**

**Notes:**

Not primary research - discussion based on literature review towards developing standards for translation tools for CALD people to access health and services information
