

Digital technologies can unite but also divide: CALD communities in the digital age

Author/s: Migliorino, Pino | **Year:** 2011 | **Publication type:** Speech | **Peer reviewed:** | **Topic area/s:** News/Opinion Piece, Social Inclusion

Reference:

Key Words:

new technologies, language barriers

Research aim:

Results/Conclusion:

In the community there is a number of groups, including ageing Cald Australians, newly arrived refugees and skilled migrants with medium level English language literacy, all of which are at risk of being excluded by new technologies that require either, or both, high level English and digital literacy. Digital technologies should be used by libraries and others to facilitate inclusion and address barriers that create exclusion.

Implications:

Cultural Group(s):

CALD

Location of study:

Age group:

Number included in study:

N/A
