

Family care: An exploratory study of experience and expectations among older Chinese immigrants in Australia

Author/s: Lo, M. Russell, C. | **Year:** 2007 | **Publication type:** Journal article | **Peer reviewed:** | **Topic area/s:** Informal Care

Reference:

Key Words:

Research aim:

The study aimed to explore the experience of 'family care' among Chinese-speaking older people who have migrated to Australia in later life.

Results/Conclusion:

Implications:

Transformation of Filial culture has implications for policy, service planning and professional practice. It cannot be assumed elderly Chinese immigrants' needs are being met through traditional family structures.

Cultural Group(s):

Chinese

Location of study:

Australia

Age group:

Number included in study:

6

Type of participants:

older Chinese

Research approach:

Qualitative

Type of data:

Primary

Secondary data sources used:

Specific scales or analytical techniques used:

Implications/ Recommendations:
