

Longitudinal studies of ageing: Implications for further studies

Author/s: Logie, Heather Hogan, Rebecca Peut, Ann | **Year:** 2004 | **Publication type:** Report | **Peer reviewed:** | **Topic area/s:** Researching CALD

Reference:

Key Words:

longitudinal studies including people aged 45+, future research, secondary data

Research aim:

The report is a mapping exercise intended to be a practical resource for informing future efforts to address ageing research needs in Australia.

Results/Conclusion:

List of longitudinal Australian studies including participants aged 45+ are described to inform future research

Implications:

Cultural Group(s):

Location of study:

Australia (national)

Age group:

45+

Number included in study:

N/A

Type of participants:

Research approach:

Review

Type of data:

Secondary data sources used:

Specific scales or analytical techniques used:

Implications/ Recommendations:

Notes:

Provides information about 24 longitudinal studies in Australia that include participants aged 45+
