Key Words:

statistics, demographics, data

Research aim:

This report describes the results of a set of projections of the numbers of overseas-born older Australians from culturally and linguistically diverse backgrounds for the period from 1996 to 2026. The projections were calculated at the national, State/Territory and SLA level for each of 50 countries of birth, 34 languages and 30 religions.

Results/Conclusion:

Implications:

Cultural Group(s):

50 countries of birth represented

Location of study:

Australia (national)

Age group:

65+

Number included in study:

N/A

Type of participants:

Research approach:

Type of data:

Secondary

Secondary data sources used:

ABS projections data

Specific scales or analytical techniques used:

Implications/ Recommendations:

Notes:
