

Transcultural dental training: addressing the oral health care needs of people from culturally diverse backgrounds

Author/s: Marino, R. Morgan, M. Hopcraft, M. | **Year:** 2012 | **Publication type:** Journal article | **Peer reviewed:** | **Topic area/s:** Dental, Culturally Appropriate Care

Reference:

Key Words:

dental health, culturally appropriate care, cultural awareness

Research aim:

This paper provides an overview of the transcultural issues in oral health care which might confront dental students when treating culturally diverse patients. It will also discuss possible modifications to the dental curriculum to ensure that the future oral health workforce understands the complex health care needs of a multicultural society. This information will give planners and stakeholders an insight into the nature of the cultural issues which future dentists are likely to encounter while treating patients from diverse cultural backgrounds.

Results/Conclusion:

Implications:

This would help to establish the need to incorporate transcultural awareness modules to enhance quality of care and to respond effectively and sensitively to cultural issues.
